| About Morningstar Indexes                      |

# **Overview**

The Morningstar<sup>®</sup> ADR Moat Composite Select Index is designed to provide exposure to ADRs of wide and narrow moat companies in the Morningstar Global Markets ex-US Index as determined in an independent research process by the Morningstar Equity Research team.

For more information on the moat rating process and fair value estimation performed by Morningstar Equity Research, refer to <u>Morningstar Equity Research Methodology</u>.

This index does not incorporate environmental, social, or governance criteria.

**Index Inception and Performance Start Date** 

The index inception date is January 21, 2022, and the performance start date, when the first back-tested index value was calculated, is December 16, 2011.

# **Index Construction**

#### **Starting Universe**

At each reconstitution, constituents of the Morningstar<sup>®</sup> ADR Moat Composite Select Index is constructed by substituting the constituents of the Morningstar Global Markets ex-US Index (benchmark) with American Depository Receipts (ADR) for each constituent, where available. For more details on benchmark construction, refer to the <u>Construction Rules for Morningstar</u> <u>Global Markets ex-US Index</u>.

All constituents which are deleted from the benchmark during reconstitution or rebalance will be simultaneously deleted from Morningstar® ADR Moat Composite Select Index.

# **Eligibility**

4

To be eligible for inclusion in the Index, all constituents must meet the following criteria:

- For the substitution, only level II and level III ADR listed on the New York Stock Exchange, NASDAQ, or the American Stock Exchange are eligible. Constituents of Parent Index without ADR listings are excluded.
- Securities that have more than 10 nontrading days in the three calendar months immediately before reconstitution are excluded.
- Company is assigned an economic moat rating of wide or narrow by Morningstar's Equity Research team.
- Company must have 12 months of price history.

• Momentum Screen

Eligible securities are ranked by total return from thirteen months to one month ago. For example, the total return is calculated for trailing 12 months through the end of November for the December reconstitution. The securities in the bottom 20% are screened out.

Each security that meets the selection criteria above is included in the Morningstar® ADR Moat Composite Select Index.

# **Portfolio Construction**

Number of Stocks

The number of stocks in the index is variable, subject to the selection and eligibility criteria at the time of reconstitution.

# Index Weighting

The index is equal weighted. For more details, refer to the Morningstar Indexes Calculation Methodology rulebook.

# **Index Maintenance and Calculation**

## **Scheduled Maintenance**

The index is reconstituted, where the membership is reset, and rebalanced annually. Adjustments are made on the Monday following the third Friday of December. If the Monday is a holiday, reconstitution occurs on the Tuesday immediately following. The market data used for reconstitution is as of the last trading day of November.

The analyst data (moat rating and fair value estimates) used to reconstitute the index is as of the first Friday of the reconstitution month

Refer to Appendix 2 for details on reconstitution and rebalancing.

Index files are published according to the global calendar schedule. For more information, please refer to the <u>Morningstar</u> <u>Indexes Holiday Calendar</u>.

# **Corporate Actions**

The treatment of corporate actions will be as per the alternatively-weighted indexes. For more details, please refer to the Morningstar Indexes Corporate Actions Methodology rulebook

**Index Calculation and Price Data** 

Details about index calculations and price data can be found in their respective rulebooks: <u>Morningstar Indexes Calculation</u>. <u>Methodology</u> and <u>Equity Closing Prices Used for Index Calculation</u>.

# **Methodology Review and Index Cessation Policy**

The index methodology is continually reviewed to ensure it achieves all stated objectives. These reviews consider corporate action treatment, selection, and maintenance procedures. Subscribers to the index will be notified before any methodology changes are made. For more details, refer to the <u>Morningstar Index Methodology Change Policy</u>.

Morningstar also notifies all subscribers and stakeholders of the index that circumstances might arise that require a material change to the index or a possible cessation of the index. Circumstances that could lead to an index cessation include, but are not limited to, market structure change, product definition change, inadequate supply of data, insufficient revenue associated with the index, insufficient number of clients using the index, and/or other external factors beyond the control of the Morningstar Index Methodology Committee.

Because the cessation of the index or benchmark index could disrupt subscriber products that reference this index, all subscribers are encouraged to have robust fallback procedures if an index is terminated. For more details, refer to the <u>Morningstar Index Cessation Process</u>.

# **Data Correction and Precision**

# **Intraday Index Data Corrections**

Commercially reasonable efforts are made to ensure the accuracy of data used in real-time index calculations. If incorrect price or corporate action data affects index calculations, corrections are applied prospectively.

# **Index-Related Data and Divisor Corrections**

Incorrect pricing and corporate action data for individual issues in the database will generally be corrected upon detection. In addition, an incorrect divisor of an index, if discovered within two days of its occurrence, will be fixed retroactively on the day it is discovered to prevent an error from being carried forward. Commercially reasonable efforts are made to correct an older error subject to its significance and feasibility.

For more details, refer to the Recalculation Guidelines.

# **Exceptions**

While Morningstar will seek to apply the method described above, the market environment, supervisory, legal, financial, or tax reasons may require an alternative approach to be adopted. A decision to take an alternative approach will be made by the relevant Morningstar Indexes Methodology Committee, and in all instances, the application of a nonstandard process will be reported to the Morningstar Indexes Oversight Committee.

# **Appendixes**

**Appendix 1: Modifications to the Rulebook** 

| Section  | Description of Change                                 | Update Date |
|--|---|-------------|
| Entire Rulebook  | Moved to new rulebook template                        | July 2023   |
| Data Correction and Precision  | Computational and Reporting Precision Section Removed | May 2025    |
| Index Maintenance & Calculation Analyst data used for reconstitution updated from the Tuesday<br>before the second Friday of the reconstitution month to the first<br>Friday of the reconstitution month |   | May 2025    |

# **Appendix 2: Glossary**

| Section        | Description   |  |
|----------------|---|--|
| Reconstitution | During each reconstitution, the steps mentioned in the index construction process are performed, resulting in membership reset. |  |
| Rebalance      | During each rebalancing, the weights are reset to their target based on the approach outline in the weighting section.          |  |

## **About Morningstar Indexes**

Morningstar Indexes was built to keep up with the evolving needs of investors—and to be a leading-edge advocate for them. Our rich heritage as a transparent, investor-focused leader in data and research uniquely equips us to support individuals, institutions, wealth managers, and advisors in navigating investment opportunities across major asset classes, styles, and strategies. From traditional benchmarks and unique IP-driven indexes to index design, calculation, and distribution services, our solutions span an investment landscape as diverse as investors themselves.

## **Morningstar Indexes Methodology Committee**

The Morningstar Indexes Methodology Committee oversees all new index development, index methodology changes, and cessation of indexes for any indexes where Morningstar owns the intellectual property. This committee is also charged with ensuring that indexes align with Morningstar Research principles and values. The group comprises members of the index team with index research, product development, product management, client service, index implementation, and operation expertise who provide the first layer of governance over index design and methodology.

#### **Morningstar Indexes Operations Committee**

The Morningstar Indexes Operations Committee governs the processes, systems, and exception handling of the day-to-day management of all live indexes, including index rebalancing and reconstitution, restatements, market classification, and contingency management. The committee oversees the annual review of index methodology (as required by U.K. and EU benchmark regulations, or BMR), ensuring that methodologies remain fit for purpose and continue to achieve their stated investment objectives. The group comprises members of the index team with data, operations, corporate actions, product development, index launch, client service, and index management experience who provide the first layer of governance over index operations.

#### **Morningstar Indexes Oversight Committee**

The Morningstar Indexes Oversight Committee is responsible for the index oversight function as per the requirements of the U.K. and European BMR, providing independent oversight of all aspects of the governance of benchmark administration as required by the relevant BMR. Its remit extends to all calculation and administration-related business activities of Morningstar Indexes, including administration of Morningstar-owned benchmarks as well as client-owned benchmarks and index calculation. The oversight function is part of the organizational structure of Morningstar but is separate and independent from the index business, index management, and the other index committees.
